

The simple and secure way to protect your business.

Physical Access Control is defined as having the power to allow or restrict a person(s) ability to enter a controlled space. Securing your business is critical. We can help you with door systems and securing important areas. We partner with leaders in cloud access. With systems on the cloud, you can manage employee and public entrances from anywhere!

Secure your business investment with access control.

Access control begins with securing the doors of your business and can grow with your needs. Management needs to be in control of how their sites are used to ensure the best outcomes. Brivo Access provides that control. Further, features like generating user reports, suspending building access, and screening visitors are just the beginning of the tools at your disposal through an access control system.

Monitoring your facility and key features

Access control gives you power over many areas of your business. Features that can be included with your system include:

- Managing access to your facility remotely 24/7
- Eliminating hidden maintenance costs
- Giving or revoke building access instantly
- Enforcing access control policies
- Monitor employee behaviors remotely
- Saving time - no more reissuing keycards
- Unlimited site, door, and camera capacity
- Unlimited users and administrators
- Simple hardware installation
- Automatic notifications for any unusual behavior

- Real-time activity alerts for access granted or doors being held open

Verify visitors and entry use with video. Credentials can be matched with video footage to ensure you know how your facility is being used.

NEW ADDITIONS TO CLOUD ACCESS CONTROL

Mobile Management

Use today's in-hand technology to streamline process and simplify usage.

- Open doors with your smartphone
- Eliminate physical cards and readers
- Quick activation
- Opening a door is a click away
- Eliminate reissuing keycards
- Application is available on iOS and Android devices

Property Management Access Control

Deliver convenience, amenities, and security so residents are willing to pay more and want to stay longer. This solution can also protect your investment with a seamless digital experience. Also, imagine having self-guided showings! Find out more today!

For Video Surveillance

Monitor your facilities on the go without DVR. All your footage is available on the cloud so there's no hardware to maintain.

- Combine access control with video surveillance for a complete security management solution
- Spot suspicious or dangerous conditions before an incident occurs
- Monitor employee performance and productivity
- Automatically tie access control events to video recordings and retrieve records faster
- Review live video from anywhere
- Online video storage that can be expanded as your needs change
