## Is it time to upgrade? It's easier than you think!

Has it been more than 5 years since you've installed your system? Upgrading your access control system is easier than you think! Cloud-based applications can extend the life of your door system by eliminating on-site servers. In many cases, we can even use some of your existing hardware!

## Access anywhere!

Manage your facilities from wherever you are; whenever you need access! We can leverage mobile devices for enhanced functionality such as door entry and management of your system. Cloud applications can be tailored to how your organization functions and can always keep you up-to-date.
All of this allows businesses to have more control over who enters their building and when.

## The future is NOW!

Updating your system is easier than you think! Newer methods offer enhanced protections and easier management off-site.

### Pandemic Protections
It's important to leverage your resources to protect your business during the pandemic. Access control can help by generating user contact reports. Additionally, you can control personnel by suspending access until screenings are completed. Visitors can also be screened.
We can also provide you with a mobile screening option to identify users with COVID symptoms before they enter your site.

### Employee Protocol Enhancement
Get more from your door access by incorporating mobile use. New items include having one place to create credentials for multiple facilities.
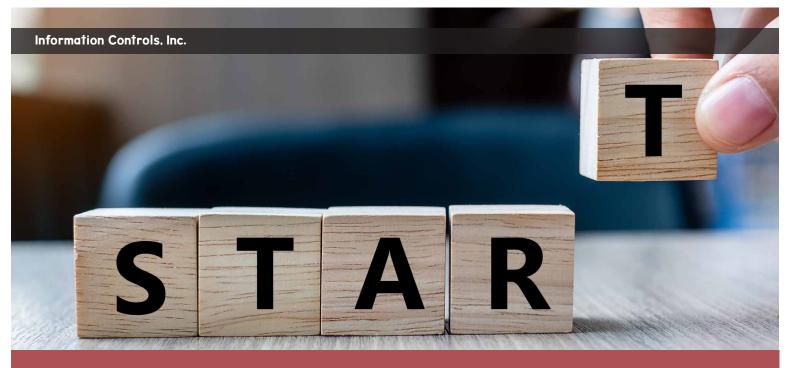

Management options available to unlock doors from any location. Users can also view live door activity and recorded video footage. Remotely assign and revoke credentials which can be sent directly to a user's phone.

### Instantly Lock All Doors
In the case of emergency, having lockdown protection can offer peace-of-mind. Lockdowns can be initiated through the app for a variety of reasons.

## UPDATE AND UPGRADE

### Implement and Integrate

Implementing an update is easier than you think. We can walk you through the steps. Your current equipment will be evaluated to see if savings can be achieved through their partial use.

Once you have your new equipment installed you will have freedom to access your doors wherever and use the newest options.

**Time & attedance + building access - finally integrated**
Now that time & attendance and access control are integrated, users can reach a whole new level of understanding on the operation of their facilties. **These two pieces of software are designed to bridge together – an option that cannot be found in other solutions.**

Employee badges work across both the time & attendance and building's access. See when employees gain access to the building and again when they punch in for their shift. Reports can be run to see how these two factors are impacting your organization.

Our secure, browser-based software is easy to use and doesn't require the expense of maintenence by your IT department. It saves your employes – and you – time  by flowing instantly. Changes to employee access and employment status happen simultaneously, in both applications. Access to the building and employee status are changes simultaneously in both applications. It's fast and easy!
