

Medical Records Scanning and Digitization

Information Controls can quickly and accurately digitize patient records to streamline office operations. We provide paper-to-digital image conversion services for healthcare client applications.

EXPERIENCE THAT MATTERS.

We have been helping our clients with their document processing for over 35 years. Once we digitize your documents, our software tools can allow your key staff access to those records. Let us show you how we can make your archived files work for you more effectively.

SOLUTIONS FOR YOUR BUSINESS.

We provide scanning and storage solutions for any size clinic, office, or practice.

As a provider of flexible and affordable document scanning and digitization services, the team at Information Controls will be pleased to create a service package based on your needs, at no cost to you.

Our storage capabilities are second-to-none. In addition to our competitive pricing, we offer climate-controlled, secure storage that is HIPAA compliant. When you need a file to be pulled, we are able to promptly fill your request.
