

More than just a security system.

Eagle Eye Networks is a global leader of cloud video surveillance, revolutionizing the way businesses of all sizes and types address their security needs.

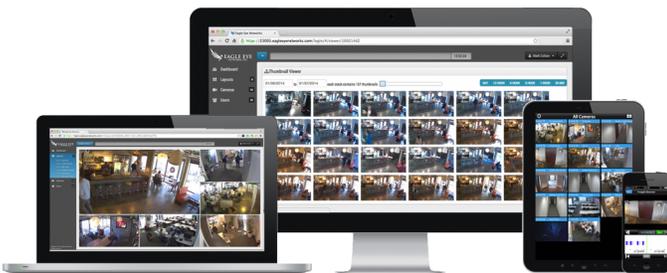

A cloud video solution

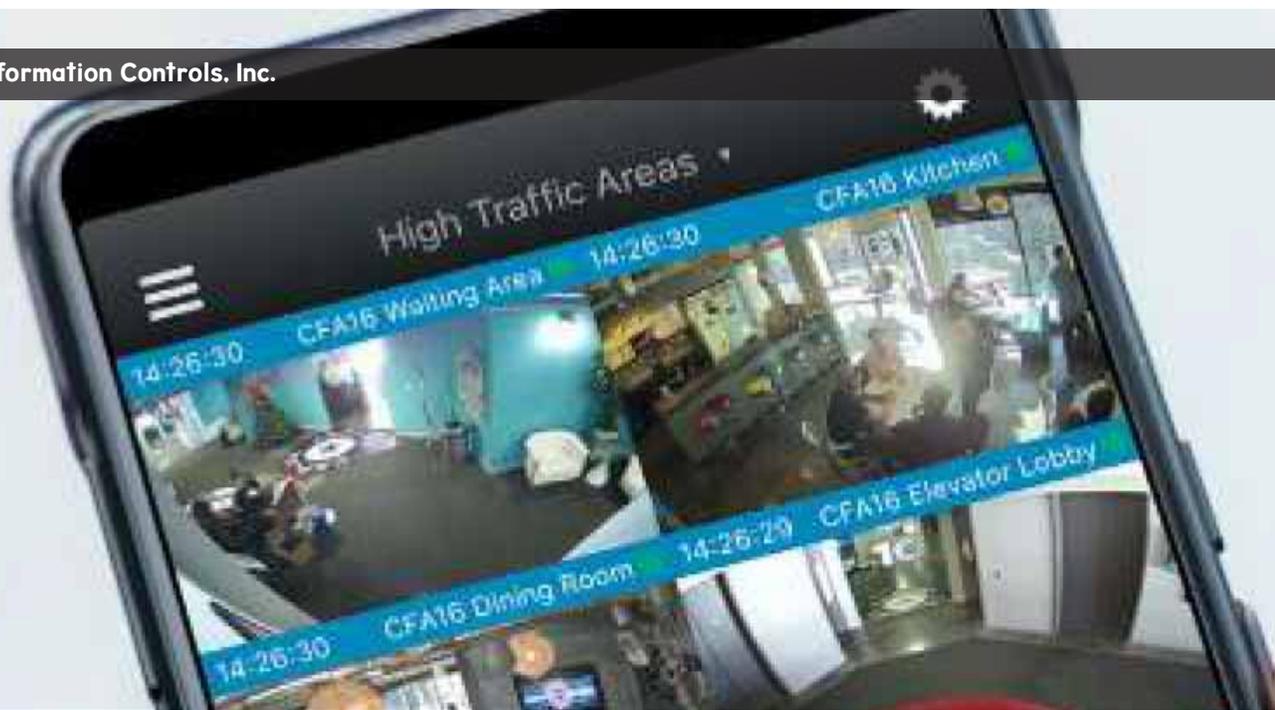

This specialized video system allows access to historic and real-time video. The software is simple and requires no additional software. By storing video in the cloud, businesses minimize the hardware needed and the cost associate with it. Paired with broad camera compatibility, numerous analytic tools, and an open API platform, Eagle Eye Networks provides businesses with a tool that is more than just a video security system.

Modernize your video security

Traditional video security systems require substantial amounts of hardware, complicated installations, and constant software maintenance and management. Eagle Eye Networks is here to change that.

The Eagle Eye Cloud VMS revolutionizes video surveillance with an infinitely scalable and comprehensive solution that streamlines everything from user management to flexible cloud and on-site storage options.

EFFECTIVE WITH A WIDE RANGE OF USES

PARKING MANAGEMENT

License plate data can be shared with the access control system to allow or deny entry. Users of a tenant management system can see parking availability, and decide whether or not to drive into the office.

QUICK SERVICE RESTAURANT

Video integrated with point-of-sale system can identify and authenticate suspicious transaction all in one place, detecting fraud, and mitigating loss.

BUILDING MANAGEMENT

Occupancy data can be shared with the building management system to automatically raise or lower HVAC and electricity, saving power and money.

LOGISTICS

Cameras can be integrated into logistics software to track packages through the supply chain process.

RETAIL

Shelf inventory can be shared with the supply chain system to determine product delivery and restocking needs.

CONSTRUCTION

Video and analytics detecting safety helmet usage can be pushed to the compliance system to determine if employees are following safety protocols.

BOOST YOUR VIDEO BY PAIRING WITH BRIVO

Eagle Eye integrates perfectly with Brivo access control. While Eagle Eye video works great on its own, the power is boosted with Brivo. Events are tracked and video clips are available in one spot. As a result, administrators can see who is entering their building in real-time or historic video. Put this dynamic duo to work for your business!
